

# THE GLEICHEN

VOLUME XXVIII NO. 15

GLEICHEN, ALBERTA, WEDNESDAY JUNE 26, 1935

SUBSCRIPTION \$2.00 PER YEAR

## JOHN GLAMBECK REPLIES TO HIS CRITICS

When I wrote my article regarding Social Credit, I expected to hear criticism and The Call of June 21 proved I was correct.

My old friend Mr. Trego agrees with my views on social credit, while Mr. A. C. Robertson thinks my views on the old parties and the Farmers Government are correct, but what I said on the impossibility of social credit to function is all "haywire." So here we are, three different writers all sitting at the same office, viz the betterment of the condition for the farmers, workers and the common people, but looking at it from three different standpoints. My friend Mr. Trego knows that I have been a U.F.A. member since 1910. I am still holding a membership card in the association. I have also worked for and helped to keep the Farmers Government in power at Edmonton, although I have not always agreed with it and will say that I do not blame the U.F.A. Government for the fall of prices on farm products. Nor do I think it could have possibly prevented it. One thing I do blame the U.F.A. Government for is the brutal treatment they have constantly meted out to the workers on the streets or the unemployed. In this regard they have acted no different from the government of the old parties. But there are other reasons why I think the U.F.A. Government can no longer fill the bill.

We stand today on the cross-roads between the old and the new, and unless we are blind we must know that the old capitalist system, as we have known it in the past, has completely broken down. It can no longer employ the workers, but we see them either fed by the state or travelling across country, beaten and jailed by the police, while the masses of farmers are sinking lower and deeper into debts and poverty. We have arrived at a point where to save ourselves from utter ruin and degradation we must adopt more radical measures than elect another Farmer Government for the next five years.

Mr. Trego mentioned that the farmers income during the period from 1925 to 1929 of 271 million dollars have since sunk to 141 million and that if they had received good prices for their products they would have kept the telephone line, bought new machinery, clothing, etc. Sure thing! But Mr. Trego does not seem to understand the reason why prices have gone down, nor does he understand that those formerly good prices will never come back while the capitalist system lasts. The production of labor saving machinery and world crises has thrown millions of workers on the street in every country, reducing their buying power to almost nothing, not to mention the general reduction in wages of those still at work. The farmers with their improved farm machinery, now produce so much wheat and other farm produce that the world is swamped with it, and no matter how hungry people, in this and other countries may be, they have no money to buy with. I would like to ask Mr. Trego how he expects prices on farm products to come back under those conditions or does he think another five years of U.F.A. Government will solve this?

Mr. Robertson does not like the picture I painted showing what the banking interests and capitalists might do providing Mr. Aberhart's social credit system went into operation. He thinks the capitalists will keep shy of any revolutionary tactics. Perhaps, but I have always noticed that whenever the workers in any industry struck for a few more cents per day that would cut the profit of the owners in that industry, the owners, never hesitated to use police force, gun, militia and courts to defy the strikers.

If Mr. Robertson thinks his social credit can be put in operation without hurting the profits of anybody good and well. On the other hand if it interferes with the profit of anybody look out.

To both Mr. Trego and Mr. Robertson, I would point out that we are living under desperate conditions today. Conditions that neither social credit nor a Farmers Government can

remedy. The private ownership of the machinery of production, distribution, etc., in the hands of a small class and operated for profit for that class, is strangling us and the sooner we realize this and organize for the overthrow of that system the better off we shall be.

I realize that the power of a provincial government or any party is limited. But there are certain things it cannot do. But even were it otherwise, my acquaintance with the personnel of the present U.F.A. Government has long ago convinced me that they have no intention of doing anything towards abolishing capitalism. Some of them may, some are R. B. Bennett, want to reform capitalism, which is impossible, but to help in the overthrow of the capitalist system nothing doing. They have not yet realized the necessity for that.

JOHN GLAMBECK.

## CALGARY EXHIBITION AND STAMPEDE

The 1935 Calgary Exhibition and Stampede will celebrate two memorable events, the 50th anniversary of the arrival at Calgary of the North-West Mounted Police, and the 10th anniversary of the Stampede. The president, directors and management have planned to make the show the most outstanding one of its history.

On Monday, July 8th, Major General James H. MacBrien, Commissioner of the Royal Canadian Mounted Police, will officially open the Stampede, and the Mounted Police will give a show which will be the famous Mounted Police Musical Ride for the first time.

An attraction to planning a spectacular show, the Exhibition and Stampede board have appropriated \$12,000 to provide an increase of \$4,000 in exhibition prize, additional payment on improved grandstand entrance, a racing paddock facilities. The opening item of a thrilling week's entertainment will be the famous Stampede parade with its miles of Indian and Mounted Police, riding and driving over 1,200 horses, twenty bands, and this year's added attractions, attachment of the Royal Canadian Mounted Police, and the 91st Highlanders band from Hamilton, Ontario.

Canada's foremost musical organizations. "Fascinations of 1935," the gorgeous stage production will deluge grandstand audiences each evening. The program will include a colorful revue, a number of the most outstanding vaudeville acts, and Billy Lorette, the favorite clown, who will provide mirth and merriment.

This Calgary Stampede will be bigger and better than ever with an added chuck wagon race on Saturday night. A number of valuable special prizes have again been included in the \$10,000 Stampede prize list, which includes a donation of \$400 in cash, making the first money in the North American bucking contest \$1,000. Last year's entries, were the most in the history of the Stampede, the number being over 600, which it is believed is the largest entry at any Stampede ever held anywhere.

There will be seven days running horse races starting Saturday prior to exhibition dates.

An uptown morning street display will be held on Tuesday, Wednesday and Thursday mornings. This will be the most colorful event, with the Indians, Mounted Police and the 91st Highlanders Band.

The Friday morning live stock review undoubtedly draw the largest crowd in the history of this exclusive Calgary feature. In addition to the stock parade, vaudeville numbers, Billy Lorette, the draw for the valuable prizes to be given away, carrier pigeon race starting from the platform to Edmonton, the 91st Highlanders Band will be in attendance, and the musical ride will be presented, including tent pegging and section riding as a special treat for the young people. Girls and boys, 10 and under are admitted free to this performance.

Mr. Lund's marvellous wild animal exhibit, "Hunter's Paradise," will again be featured, enlarged and improved; and one of the most interesting exhibits of the Chicago World's Fair, the General Electric "House of Magic" will be a sensation. At this exhibit you will see sound, hear light and witness other startling electrical surprises. The Royal Canadian

## BAILEY TOURNAMENT WON BY THE GLEICHEN CLUB

The baseball tournament last week turned out to be a very successful affair. The local club who promoted the tournament and dance came out on the right side of the ledger, also, captured first prize by default, Strathmore in the last game during the evening.

The first game between Standard and Gleichen was won by the latter club. The second game between Strathmore and Rockyford proved to be the most interesting game of the day. It was interrupted shortly after the start by rain. When the rain let up and the diamond had dried a little bit play was resumed, although it was near 7 o'clock. Not until the last inning was the game decided, when Strathmore brought in two runs making the score 3-1. At different times both sides came very near scoring which caused much interest and excitement.

The last game between Strathmore and Gleichen went only five innings, being called on account of darkness Gleichen winning.

The dance in the evening was very well attended and much enjoyed.

## NEWS ITEMS OF GLEICHEN AND VICINITY

Tennis is coming to the fore again, and new members are joining up. With the increase in membership it has been found necessary to get the second court in condition to play. In a few days it will be ready for the flying feet of the tennis players.

In a league fixture here Monday evening Gleichen defeated Arrowood by a score of 13-8.

Next Monday, July 1st, there will not be much doing in Gleichen. Some of the nearby towns are putting on a day of sports and doubtless Gleichen people will visit these places.

The baseball team will play ball at fifty next Monday.

The government road grader started Tuesday to scarify and re-grade the streets in town, much to the delight of the local car owners.

The paint bug has hit Pale Des-ayes. Painters are busy repairing the outside of his garage.

The annual sundance of the Blackfoot Indians is on. The camp is located at the usual place, straight south of town. Sunday Indians were to be observed converging on the chosen spot. Late in the afternoon three and four outfits, such as wagons loaded with tepees, backs, squaws, babies, stores etc., followed by a lone dog, were to be seen arriving at the site. Miles away in different directions could be seen a slow moving cloud of dust that heralded the coming of other Indians by the wagon load. At camp unusual activity prevailed as the squaws bustled around and set up the tepees and then carried in big bundles of impedimenta. Hardly a brave was to be seen. Doubtless they were resting and telling stories after the long drive.

The 51st anniversary of the Alberta Union of Municipalities will be celebrated on Thursday and Friday when the annual convention will be held in Calgary.

Shows, so popular last year, will again provide fun on the midway. Special reduced reduced midway and bus passenger fares will be in force from Alberta, Saskatchewan and British Columbia mainland points.

The week's celebration will close with a marvellous program Saturday night, including an extra chuck wagon race, the "Fascinations of 1935" presentation of prizes to Stampede champions, colorful parade of regally dressed Indians, and last, but not least, Canada's largest one-night display of fireworks. At the close of the fireworks program, there will be a march past of the Mounted Police Veterans and Royal Canadian Mounted Police, headed by a band of over 100 instruments.

A free accommodation booth and the ticket office will be located at the C. P. R. station. Advance reservations for rooms and reserved seats may be made and prize lists for the different departments and illustrations folder may be obtained by writing E. L. Richardson, General Manager, Calgary Exhibition and Stampede.

## DASHES FROM CRAIGANTLER AND DISTRICT

Mr. M. MacDonald is engaged for another term at the Craigantler school. Mac likes the district and his school.

Miss Dower has been engaged for another term at the Elwood school.

The district is sorry to hear that Miss Fair, at present teaching at the Yale school, has put in her resignation. Miss Fair recently underwent an operation and is progressing favorably.

L. H. Lavidsen took two of his men to the gravel corner and promised to meet again, I won't say where, but one was very strong and said he would meet him in 10-15.

Craigantler school district keeps the lead in regard to books. Some schools not far distant had to close for want of children to attend. But it looks good for Craigantler for some years to come.

Eddie Bailey took a walking streak to Calgary and was picked up on the road by a farmer who asked him if he had paid for his board.

Miss Mildred Marcom has been engaged to again teach at the Camrose school.

H. B. Grant was on the sick list last week and the school meeting set for Tuesday of last week had to be postponed.

Tom Envidson and Charlie Grant made a nice showing in the air last Sunday. Both are splendid pilots.

Mike Christensen of the Craigantler district has the nicest place in this part of the country, and no woman helps. Mike is a bachelor. The interest he takes in trees, flowers, raspberries, strawberries and different kinds of grasses is wonderful, and is a credit to him. It is all under irrigation.

## ST. ANDREW'S ANGLICAN

10.30 a.m. Morning Prayer Service.

7.30 p.m. Evensong Service.

The service in the evening being more especially for young people.

Chas. Thompson was the successful tender for the new Namaka school. Monday Mr. Thompson started work on the building and will rush to completion. The old school which destroyed by fire sometime ago was also built by Mr. Thompson.

Frank Woods is leaving for Duchess where he will look after a store for a couple of weeks while the owner takes a holiday.

## GRAIN EXCHANGE MAKES OFFER TO AID PROBE INTO OPERATIONS

Reveals Exchange Suggested Months Ago That Appointment of Pool Man as Government Supervisor Would be Welcomed.

In order to clarify its position in view of statements made at Ottawa, the Winnipeg Grain Exchange has issued the following statement: "On Friday afternoon the Prime Minister in a speech in the House of Commons reiterated the allegation originally made by Mr. John I. McFarland last October that foreign grain firms were engaged in a bear raid in the Winnipeg market. This allegation was investigated by the Council of the Winnipeg Grain Exchange and was fully answered in a statement issued and published in the press November 2, 1934, in the following terms:

"The Council of the Exchange is prepared to afford facilities for investigation of the trading operations of all its members, without exception by competent and impartial persons, if such an investigation was deemed to be in the public interest, and has previously advised Mr. McFarland that the Exchange would be glad to lead all possible, in addition, a government supervisor of the Stamp Commission should the government see fit to appoint."

"The action of the Winnipeg Grain Exchange in setting minimum prices for December and May wheat of 75c and 80c per bushel respectively was taken at the instance of the Dominion government and in pursuance of the policy the Exchange has consistently pursued of co-operating with the Dominion government, and government wheat agencies."

"Following the issuance of this statement, R. W. Milner, the President, with the authority of the Council, advised Mr. McFarland that the Winnipeg Grain Exchange would welcome the appointment by the Dominion Government to the position of Grain Exchange supervisor, of George Mr. McFarland since December 1930, and who previously to that had been General Sales Manager of the Canadian Co-operative Wheat Producers Limited (the Pool Central Selling Agency). The offer of the Council that it was prepared to afford facilities for investigation of the trading operations of all its members, without exception, and as to the appointment of a Grain Exchange supervisor, as suggested by the Stamp Commission, has never been withdrawn. Representatives of the Winnipeg Grain Exchange now in Ottawa are prepared and anxious to appear before the special committee of the House of Commons, which has been appointed to meet the allegations which have been made with reference to the bear raid and the supposed present short position, and to supply any information which the committee may require."

## Look Ahead And Prepare

Conditions in Western Canada, considering the whole area of the prairie provinces, present a changed picture this year to that of several years past, and the change is almost entirely due to the Weatherman. With the exception of comparatively small tracts, the great grain producing area of southern Saskatchewan which in recent years has suffered a lack of moisture has been favored with copious falls of rain, and Nature has thus largely solved a problem which all Governments and individuals, despite the expenditure of tens of millions of dollars, could barely cope with and certainly could not solve.

At the time of writing—which is ten days or so before this will appear in print—prospects are not only favorable for a normal, possibly an above normal, crop, but the big problem of feed and fodder for livestock seems solved as the soil is again saturated with moisture, sloughs and creeks filled with water, and grass again covers the ground. Admittedly it is too early yet to assume that present favorable conditions will not suffer some setbacks, and it would be a mistake to take too much for granted in a country where conditions change so quickly. At the moment, however, prospects are bright, and the foundation laid by May and June rains is such as to make a decided improvement almost a certainty.

Confidence in the country is being restored and hope is returning to many who had nearly abandoned hope and were on the verge of giving way to despair. Nature has thus provided an object lesson of how puny man, notwithstanding his really marvellous achievements, when it comes to what are, after all, the deciding factors in the prosperity of any people or country. Man may plan, and should plan within those spheres where the decision and the control rests in his own hands, but all his planning will fail if it is not in conformity with natural laws, and takes into account what we erroneously term the vagaries of Nature.

With the experience of the past four or five years of drouth, dust storms, almost complete absence of feed and fodder, seed for a new season's sowing, and an absence of reserves accumulated in good years to tide over the poor years which always come sooner or later, what is going to be the attitude of people in this and, it is to be hoped, even expected, future better years? In those districts where there is now an abundance of moisture will the lessons of the past be remembered and steps proceeded with to conserve the surplus wherever possible and feasible? Or will people quickly forget and again live only in the present without taking thought for the future?

If Western Canada is blessed with a bountiful crop, plenty of hay and grasses, large quantities of wild fruits, vegetables, etc., will people, profiting by the past, begin at once the building up of reserves against a future day when Nature may not be quite so generous in the bestowal of gifts? As Western people now look over their green and promising fields, are they planning, if the promise of those fields is fulfilled in the harvest, to conserve a little something, as much as they possibly can, as an insurance for the future? Or will they quickly forget and dispose of their last resource, trusting to the future to again take care of itself?

It is no particular criticism of any person, or class of persons in this country to say that, in many respects, we have been a wasteful people, and have not practised that frugality which would have been the part of wisdom. Practically speaking, all of us have been more or less wasteful. We have employed our resources in satisfying the desires, the ambitions, the pleasures of the moment, without giving sufficient thought to the future. In above-normal prosperous years, instead of providing some reserve in a more or less liquid form to meet future needs, we have dissipated them, or locked them up in some concrete way, or used them to expand our operations beyond what was necessary or wise. Thus seeming assets have been found to be heavy liabilities.

All have made this mistake—farmers, merchants, industrialists, financiers, municipalities, provinces, and the Dominion as a whole. Nobody can well point an accusing finger at any other person. But if we are wise, if we are capable of learning anything from past experience, surely we will now as a people, individually and collectively, recognize our past mistakes and not merely resolve not to repeat them, but proceed now to follow a different course, and, like Joseph of old, in the years of plenty buy to carry us and our country through years of scarcity.

Some people in the last year or two became almost convinced that drouth and dust storms and crop failures had become a permanent condition. Those of riper experience knew better. They knew that the world has always experienced periods of plenty and periods of scarcity; that this is one of Nature's ways of maintaining an equilibrium, a safe balance. The reason is known to those who have seen the recent period of drouth and scarcity pass, and that a more fruitful period is at hand. But other periods of drouth and crop failures will inevitably come; now is the time to prepare for them because surely no person who has suffered through lack of the necessities of life in this recent period desires to pass through the same experience again.

Now is the time to take new heart, but it is also a time to think and act coolly, to keep sane, to take thought of and prepare for the future and insure oneself to the fullest extent possible against whatever misfortunes or setbacks may lie ahead.

The total shipments of certified Canadian exports of canned fruit potato seed from Canada in 1934 amounted to 1,328,745 bushels, 728, 852 bushels being shipped during the months of January to May inclusive, and 600,163 bushels from the fall to December 31.

Canadian exports of canned fruit to Great Britain were 28 per cent. greater from January 1 to March 16, 1935, than during the corresponding period of 1934. The principal increases were in canned apples, pears and peaches.

THE QUALITY CHEWING GUM

## Strange Discovery

### Huge Mound Of Black Substance Found In Northern Saskatchewan

A peculiar rock formation in the shape of a giant dome, which is considered to indicate the presence of either natural gas or oil, has been discovered in northern Saskatchewan, some 40 miles southwest of Lac Ile a la Crosse.

It consists of a huge mound of some black substance resembling low grade coal or tar sand, from the centre of which bubbles a salt spring.

Hon. T. C. Davis, K.C., attorney-general, who recently returned from an aeroplane trip over northern Saskatchewan to Lake Athabasca, brought some of the material back with him. He is making arrangements to have it analyzed.

Originally the discovery was made by the Indians, who reported this huge mound of black substance.

Several theories respecting the presence of the mound have been advanced. One is that the salt spring bubbling from the mound is brought with it a flow of oil which over a period of years has built up the mound about the spring similar to a deposit of geyserite.

The samples brought back by Mr. Davis do not appear to be inflammable, although there is a fibrous substance permeating the sample which burns.

The giant dome from which the spring bubbles is located near Vermilion lake in the vicinity of Lac Plongee—Regina Leader.

## A Marvel At Languages

### Man At 81 Has Working Knowledge Of Five Hundred

A man after George Borrow's heart is George E. Hay, who, at the age of 81, has retired from the position of professor for a month, a firm which specializes in foreign publications. Mr. Hay is said to have a working knowledge of about 500 languages, but he was chiefly engaged in Oriental tongues and he corrected proofs in Sanskrit, Hindi, Urdu, Hindi, Bengali, Oriya, Tamil, Telugu, Kannada, Malayalam, Sinhalese, Burmese, Siamese, Laos, Tibetan, Arabic, Coptic, Armenian, Ethiopic and Ancient Egyptian, also Chinese, Syrian, Greek and Hebrew. Even now he is not satisfied with his education, so that all these accomplishments were acquired by evening classes and by reading in museums and the London School of Oriental Languages. Primarily, he owed his success to a marvellous memory. Even now that he has retired his recreation is studying languages. And there are millions of people who have little more than a working knowledge of one language.

## Matter Is Settled

### Science Service Estimates Superior Is World's Largest Lake

A year or so ago the News-Chronicle entered into a discussion of the comparative sizes of Lake Superior and Lake Victoria Nyanza in Africa. Some of the school teachers, advising their pupils had declared the African lake to be larger.

Using all the information it could obtain from atlases and encyclopedias, this paper proved, to its own satisfaction, at least, that the African lake was the larger and thus the largest lake in the world. This was definite if depth were considered, for it appears that large portion of Victoria Nyanza's surface is only a foot or so above the bottom and much of it filled with reeds and grasses.

We now find the following paragraph among those issued by a science service for use in newspapers as something "interesting to know." "It is estimated that Lake Superior exceeds in size its nearest fresh water rival, Africa's Lake Victoria Nyanza, by a thousand square miles."—Fort Arthur News-Chronicle.

## To Catch Motor-Bandits

### Speed Ball To Test Fires Is Latest Invention

A policeman of Bolton, England, has just invented a "motor-bandit stopper," which is expected to halt the worst of criminals. It is in the form of a speed ball, which, when thrown in front of a speed car, bursts open into several spiked arms covering a span of six feet and guaranteed to tear the toughest tires to shreds.

A Swedish geologist concludes that the South Island of New Zealand had a warm, almost sub-tropical climate no longer ago than about 1000 B.C., after which the climate became much colder for reasons not fully understood. 2104

## COULD NOT SEW A BUTTON ON

### Her Hands Were Helpless With Rheumatism

At one time she thought she would lose the use of her right hand. But "a blessing" in the form of Kruschen Salts—put her right again. "I was sure in a bad state," she wrote. "In fact, I could not do my housework, I was so bad with rheumatism in my arms and hands, and I could not sleep at night, and I thought I would lose the use of my right hand. I could not hold anything, nor could I sew a button on my arm would go dead. I was advised to try Kruschen, and inside of three weeks I found such a change. I have kept on taking it, and now I sleep all night—thanks to Kruschen's help and relief."—(Mrs.) J. H. H.

Two of the ingredients of Kruschen Salts have the power of dissolving uric acid crystals, which are responsible for rheumatic agony. Other ingredients of these salts assist Nature to expel these dissolved crystals through the natural channel.

## Germans Challenge Record

### Bremen and Europa Will Make Attempts With Reserve Power

According to hints from German shipping quarters, the North German Lloyd liners Bremen and Europa will take up the battle for the "blue ribbon" of the Atlantic, which has been won by the French liner Normandie.

Open expression of this determination was given by the Boersen Zeitung in a dispatch from Hamburg. "It is not unlikely," the dispatch said, "that the Rex (Italian liner) or Bremen or Europa have still some horsepower in reserve with which they may give the Normandie a surprise."

The two German vessels have never used their top speed in their regular runs and have been holding back for just such competition as the Normandie or the Cunard-White Star Queen Mary is a story that always has been believed in Germany—with justification remains to be seen.

## Animals Like To Play

### Even Clumsy Polar Bears Are Great Fun Makers

Almost any time in play time with monkeys. Give a monkey a musical instrument and he will play for hours.

Another monkey delight is to dress up and act like a human. One keeper at the London Zoo trained four young chimpanzees to tell that they will take a meal at a table from tin plates and mugs, and pass everything round as politely as can be.

The Polar bears are also great fun-makers. The crew of a whaling ship once watched two bears playing on an ice floe. The main idea in their game was to push and scramble about at the edge of the ice until one was pushed into the water. Immediately the other bear would jump in beside him, and there would be another tussle until one was forced back on to the ice. The winner would also scramble out, and the game would start over again.

## Town Sees Double

### Contest In California Brought 500 Pairs Of Twins

Five hundred pairs of twins answered the call when Long Beach, California, announced a twin contest. Youngest were Patricia Gale and Gale Patricia La Forte, 11 weeks. Oldest were H. E. and A. L. McArden, hale and hearty at 85.

A twin judge performed a twin marriage ceremony attended by 21 pairs of twins as bridesmaids and another pair as flower girl and ring bearer.

The town is still seeing double.

## Turkey Mothers Hawks

Ancient enemy of the farm yard, a batch of young hawks has been adopted by a hen turkey at the home of D. Reed, a Shawnee district farmer. Reed robbed several hawk nests and brought the eggs home, and set them under the turkey hen. Hatched, she mothered the young six batters as her own.

Having a keyboard that can be extended over a bed, a piano that can be played by a person who is ill has been invented in England.

**"MECCA"**  
OINTMENT  
THE FAMILY FRIEND

## Queen Likes Natural Folks

### Not Reserved If People Chat With Her Freely

In the Jubilee number of The Manchester Guardian a contributor writes about Queen Mary this way: The Queen's mind is powerful rather than quick. She once said to a friend, "I find it a great effort to think of something fresh to say to everyone I meet." The friend replied, "Oh, your Majesty should not try. If I were in your place I should think of something nice to say when I got out of bed and say it to everyone I met that day." But the Queen replied, "Oh no, you would not. The press would get hold of it and say that you were insincere." Whatever else anyone said of the Queen it would be impossible to call her insincere.

At a first meeting people often leave all the conversation to her Majesty so as not to find her difficult to get on with and think her reserved. A very slight acquaintance, however, helps them to realize her extraordinary kindness of heart and the way in which she never forgets anyone she has ever met or misses a chance to do a kindness. It also has been interested in any case of suffering or want, and meets the person who brought it to her notice again, it may be 20 years after, she will at once say, "And how is it going now? I hope everything is all right."

In fact, anyone who will chat freely with the Queen as he would with any other lady, relying on her kindness and sympathy, will find her at once easy to get on with and charming. Her wide knowledge of the subjects that do interest her, her readiness to say when she is not an authority on any subject, her ready humor and her sincere kindness make a conversation with her a thing to remember. Her chief interest in life now is undoubtedly the little Princess Elizabeth. She is wrapped up in her, and so wonderful for a more charming little girl or one more completely unspoiled by her high position, it would be impossible to meet.

## Charged With Writing

### Anti-Italian Articles

### Italy Has Expelled Rome Correspondent Of Chicago Tribune

The Italian government press bureau has expelled David Darrah, the Rome correspondent of the Chicago Tribune. Darrah and his wife were forced to leave immediately. The reason for Darrah's expulsion was given as the writing of anti-Italian articles.

The bureau also issued an order banning until further notice the entrance of copies of the New York Times to Italy as a result of an editorial entitled "Baldwin and Mussolini."

The editorial appeared in the Times after recent speeches of Prime Minister Stanley Baldwin of Great Britain and Premier Benito Mussolini of Italy.

The action against the New York newspaper follows a similar one against a group of English newspapers, including the Manchester Guardian, and the lifting of a ban against German newspapers, including the Nazi organ, the Volkischer Beobachter.

## Silver Boom In Yukon

### Miners Are Pouring In To Camp At Mayo

By air, land and water oldtimers and newcomers are hitting the trails back to the rich silver camp at Mayo, Yukon Territory, which is showing signs of returning to old-time activity on the crest of rising silver prices. To-day every available house, cabin and shack in Mayo has been taken up by the influx of miners. Large silver operators are tuning up their equipment preparatory to getting under way, while individual claim owners have started already to get out ere for summer shipment.

## New Air Conditioner

An air conditioner costing so little it is within the means of the average householder was described to the American Society of Heating and Ventilating Engineers in Toronto by W. A. Stark, Cleveland. The conditioner uses a porous sand known as silica gel, which absorbs water vapours from the air and poisons from the human system.

The human scalp has approximately 1,000 hairs to the square inch, the average head containing 110,000 hairs. Women have a higher average than men, while red heads average only 90,000.

It is wonderful to have a friend, but it is still more wonderful to be a friend.

## What are the mild leaves saying?

"You've got to be good to get into Ogden's!" And it's true—only the choicest, mild, fragrant tobaccos are selected for Ogden's Fine Cut. So why shouldn't Ogden's be smoother and cooler? You simply can't beat Ogden's—it's got all you want in a cigarette tobacco.

Ogden's Fine Cut and "Vogue" or "Chanteur" papers; ; ; any man who's tried the combination will tell you it's a guarantee of better and more satisfying cigarettes.

## Makes Testing Safer

### Spinning Device Determines Whether Auto Wheels Need Adjusting

Eliminating hazardous road tests for "shimmy" and wobble, a dynamometer spinning device subjects each wheel to a similar test without removing the car from the repair shop. The machine consists of a spinner wheel mounted on the shaft of an electric motor and carried on a small rubber-tired dolly. The speed of the motor is controlled from the end of a tubular handle like a vacuum cleaner. The spinner wheel rocks from side to side for adjustment to the plane of the cambered auto wheel so that the tire will not be damaged. The test is made with the wheel on the spindle, each wheel being jacked up and spun with the machine. The motor quickly accelerates the wheel to eighty or 100 miles an hour. When the shimmy speed is reached the whole car shakes violently, indicating the wheel is out of balance and that it should be removed and trued up.—Popular Mechanics.

## Choir Boys Liked Tour

### Twelve Youngsters Return To London After Tour Of Canada And U.S.

Soda-fountain chocolate milkshakes made a deep impression on all but one of 12 youngsters of the London choir school who returned to England from a concert tour in Canada and the United States.

The young choristers expounded their views on the United States and Canada in epigrammatic fashion, with food the predominant note. "Chocolate milkshake is a marvellous drink!" one of them said. "I don't suppose I'll be able to get anything like it over here."

**DR. DANDRUFF**  
and falling hair, use Minard's exactly as you would any hair tonic. Do this twice a week and the result will be a

## Frost Resisting Grains

Reliance Wheat and Regal Barley Shown To Be Hardy

The frost of June 4 was a blessing from the viewpoint of the plant breeder, for it made possible critical selection of the frost resisting plants, said Professor J. B. Harrington of Saskatchewan University.

There was about three degrees of frost which resulted in frost susceptible varieties, hybrids and selections being injured much more than those having a large measure of resistance. Perhaps the most outstanding observation was the very high frost resistance of Reliance wheat and Regal barley as compared to the susceptibility of Marquis wheat and Colless barley, Professor Harrington said.

Reliance and Mindum (Durum) were practically untouched, whereas adjacent rows and fields of Marquis were damaged to the extent of each plant having one or both of its leaves killed throughout much of their length. Compared with Marquis, Reward wheat was injured distinctly more, Colless slightly more and Garnet not at all.

Regal, the new smooth-awned barley, escaped with very little injury, but Colless had most of its leaves killed back to an even greater extent than Marquis wheat. O.A.C. No. 21 and Hanchen proved to be less resistant than Regal, and Treb was still less resistant.

None of the oat varieties suffered much, but it was noticeable that Banner was less injured than Victory and Gopher.

Flax suffered the most in another field where there was more than three degrees frost, and many seedlings were killed off. In fields where the frost was less severe, about a quarter of the flax seedlings were badly injured and about a quarter not injured at all.

In the wheat hybrid nurseries, Professor Harrington found it was possible to note all of the lines that possessed the superior frost resistance of Reliance in contrast with those which inherited frost susceptibility from their other parents.

Concluding the professor said, investigation work on frost damage to individual plants had demonstrated that a single frost such as experienced June 4, might set back wheat plants to the extent of decreasing the eventual yield of grain to the extent of about 10 per cent. Cereal plants, he said, almost always recovered from spring frost damage, but the injury and setback in the growth process was unlikely to be compensated for later on.

A bee-keeper has developed a bee that won't sting. Now let him try his luck on an antless picnic.

## WEAK WOMEN

ARE you tired, nervous, run down? No pep? No ambition? Take Pinkham's Vegetable Compound. It quiets quivering nerves—improves the appetite—makes life seem worth living again.

Mrs. James Martin of 227 1/2 Main Street, Edmonton, Ontario, says: "Your Vegetable Compound built me up wonderfully. I have gained pep, my nerves are better and I have a good appetite. I feel much stronger."

Try Lydia E. Pinkham's Vegetable Compound

## Another Use For Helium

Choking Can Now Be Relieved By Balloons Gas

Choking of nearly every sort can be ended by helium.

This new use of the balloon gas to save lives, from babies who swallow lumps or choke with crump to adults with strangling obstructions in their breathing tubes, was shown at the scientific exhibition of the American Medical Association in Atlantic City, N.J.

The helium is mixed with oxygen to make an artificial air, 80 per cent. helium and 20 per cent. oxygen. The first medical use of this odd air, to relieve asthma, reported in Philadelphia two months ago, has been followed by rapid spread to other breathing troubles.

These were exhibited by Alvan L. Bacon, M.D., of the Columbia Presbyterian Medical Centre, New York. They include motion pictures of children whose chests heave at one moment with the effort to breathe ordinary air, and who the next moment, under a helium tent, lie still breathing effortlessly. The new light weight of the helium air—which is one-third that of ordinary air—makes the difference.

It passes readily through the choked breathing passages with one-third the muscular effort needed to draw real air through the same space.

The physical principle behind this is a law that the force required to move gas is directly proportional to its weight.

## Mass Parachute Leap

Young Women Awarded Prizes By Soviet Government

Six young women, aged between 20 and 23, basked in public acclaim recently for their record mass parachute leap from an altitude of 4½ miles without oxygen apparatus.

Each received her parachute and a prize of 1,500 rubles. (A paper ruble is worth about 2½ cents on the Moscow unofficial exchange). The prize was a sign of the government's recognition of their feat.

The women jumped one after another from a big passenger plane and landed 30 miles from Moscow. One of the girls was Olga Yakovleva, 23. It was her 44th jump.

The mass jump was prepared by the experimental institute of the people's commissariat of heavy industry, developing new types of parachutes, including one which is 190 feet in diameter and which, it is claimed, can land a load of six tons.

## Movies Are Speculating

Colored Films Arouse Much Uneasiness in Hollywood

Two young men from the social register are pointed out as responsible for Hollywood's newest uneasiness. They are John Hay Whitney, 30, and his cousin, Cornelius Vanderbilt Whitney, 35.

As officials of Pioneer Pictures, Inc., they have installed a motion picture photographed in colors at a theatre in New York and set a great part of the industry to anxious speculation.

Actors and directors are openly concerned. Actresses, especially, are fearful. Their pigmentation may be unsuitable to the color camera, they fear, and they will be ousted from favor like the stars of the silent movies when talkies come in.

## Message From Lady Byng

Expresses Thanks To Canadian People For Their Sympathy

A message of thanks to those in Canada who "remembered her in these dark days of her irreplaceable loss" was received from the Viscountess Byng of Vimy by Col. H. Willis O'Connor, aide de camp to the governor-general, who acted in the same capacity for Lord Byng.

The message read as follows: "The Viscountess Byng of Vimy wishes to thank all the personal friends, associations and military organizations, who have so kindly remembered her in these dark days of her irreplaceable loss. To her, as to Lord Byng, Canada has always been a second home, and its people their most true and valued friends."

## Armistice Was Off

After an immense amount of trouble the vicar of a country parish succeeded in reconciling two old women who had been quarrelling for years. He even induced them to meet under the vicarage roof.

In his drawing-room they shook hands. After an embarrassed silence one of them said: "Well, Mrs. Tyler, I wish you all you wishes me."

"An' who's saying nasty things now?" snapped Mrs. Tyler. 2194

## WILSON'S FLY PADS REALLY KILL

One pad kills flies all day and every day for 2 or 3 weeks. 3 pads in each packet. No spraying, no sickness, no bad odor. Ask your Druggist, Grocery or General Store.

10 CENTS PER PACKET WHY PAY MORE? THE WILSON FLY PAD CO., Hamilton, Ont.

## Strengthen German Fleet

Double Present Limitation Allowed By Agreement With Britain

A naval agreement formally reached between Britain and Germany agrees that the total strength of the German fleet shall in no circumstances exceed 35 per cent of the British fleet.

The agreement provides for a double limitation on the size of the German navy.

A global limit of 35 per cent of Britain's effective naval tonnage as determined by international agreement.

The first provision means Germany agrees to limit her total tonnage to 35 per cent of Britain's. The second means Germany cannot apply her total of 35 per cent, to construction of one particular category of warship.

This was the main difficulty confronting the two delegations. British delegates pressed for category limitation of Germany's total allowance under the agreement might be used to cover the sea with German submarines.

Italy presented a note to Britain, reserving her views on the Anglo-German agreement, but stating she was willing to discuss the situation at any time.

Diplomats expressed the opinion Great Britain had removed definitely any possibility of a rekindling of old Imperial German ambitions to rival England as a sea power.

France informed Great Britain any Anglo-German naval agreement signed without full protection for France would mean denunciation by this country of the Washington naval treaty, as Japan already had denounced it.

German official circles were jubilant over their naval understanding with Great Britain, asserting the reich will build up her navy as fast as possible to 35 per cent of Great Britain's sea power. Nazi authorities said they considered the naval accord capable of lifting Germany from the isolation into which they believed she was plunged by the Russo-French mutual assistance pact.

## Destiny Of Italy

Mussolini Visualizes Time When Might Modern Rome Will Equal That Of The Ancient City

Premier Mussolini told 7,000 war veterans "Soldiers always prefer action to words and we are a nation of soldiers."

The destiny of modern Rome, he declared, may well equal in greatness to that of ancient Rome.

He spoke briefly for the Coliseum, imposing monument of the time when the city ruled all of the known world, to ruin of grenadiers.

The dictator gave as one of the reasons for the brevity of his address the fact "matters of great importance to the nation are yet in a state of flux."

"These stones," he said, pointing to the massive blocks of the Coliseum, "are eloquent of the greatness of Rome, achieved through the force of her arms and the wisdom of her laws. Nothing prevents us from believing the destinies of yesterday will not be those of tomorrow."

## Majority Are British

Census figures just published reveal that 225,684 persons from the Dominions and Colonies were resident in Britain or were there as visitors, compared with 43,912 persons (the highest of any European country) from Poland and 36,133 from Russia. People born in the United States numbered 37,429. Some 3,672 people were "born at sea" and 140,000 did not state where they were born.

There are none so blind as those who cannot see—a train approaching a railway crossing.

## Producing Real Wealth

Foot's Gold Nests Quebec Treasury Millions Of Dollars Yearly

About 400 years ago Jacques Cartier took back from Quebec to France a cargo of what he thought was gold.

The learned metallurgists of the day laughed at the explorer and told him that he had brought back "fool's gold." What Cartier had mistaken for gold was iron pyrites, a sulphide of gold with geographical distribution and relatively of little value.

The same ore is to-day helping to bring into the Quebec treasury an annual income of some \$12,000,000. When gold was discovered in Northern Quebec in 1911, an intensive mining development set in, and "fool's gold" ore is being made to produce from \$10 to \$12 of real gold to the ton.

Who laughs last laughs best.

The metallurgists who laughed at Jacques Cartier four centuries ago may have been at the top of their profession at that time, but a lot has been learned about metallurgy since then.

And a lot more will be learned in the future, we doubt not, about utilizing materials which lie all about us to-day and which the present generation regards as useless.

The moral of all of which is that it is safer not to laugh too loud at anything.—Detroit Free Press.

## THE RHYMING OPTIMIST

By Aline Michaelis

### PICTURE

A white lane goes into the west.  
A lane that leaps  
The great hills' crest,  
Side of the road,  
Black pines stand up  
Against the sun's  
Bright golden cup.  
Among the trees  
Bold blackbirds wing;  
Black branches sway,  
Black needles swing.  
The white road gleams  
In day's last light;  
Above a star  
Not gold, but white.

### Successful Surgery

Completes Most Delicate Operation Known To Medical Science

A delicate brain operation, doctors believe, will restore Ivan Olsen, 10-year-old accident victim, to normal health.

Performed in the University hospital at Edmonton, the operation involved "scraping" the brain. This removed pressure on the brain and certain degeneration of the tissues. It is one of the most delicate operations known to medical science.

Prior to the operation, young Olsen had been in a semi-conscious condition for three months in the hospital. The youngster suffered head injuries when he was thrown and dragged by a horse.

### No More Noisy Wagons

Must Be More Quiet Or Stop Their "Scraping" The Brain

Following London, England's example of a curfew on automobile horns, St. Catharines, Ont., is going to clamp down on plodding milk horses.

Milk companies and bakers must either take their wagons off the street in the earlier hours of the morning or make them noiseless.

British research shows that chilled beef can be held in good condition 60 to 70 days in an atmosphere containing 10 to 20 per cent. of carbon dioxide.

Consumption of flour per person in the United States has dropped considerably in the past 50 years.

## The Inefficient Driver

is One Who Ignores Common Courtesy Of The Road

It is true, as we all know, that many persons, otherwise polite and considerate, when put at the wheel of an automobile become seized of the obsession that they are lords—or mistresses of creation, have rights superior to the rights of common people who walk, need have no regard for the ordinary rules of courteous conduct. It is a pity, but such is the fact, and in this fact lies the explanation of many an accident.

There are women who drive in the glad assumption that male drivers will accord them right of way under all circumstances; that a motor car driven by a woman just naturally is shown the courtesies extended a lady in her drawing-room.

There are men who use the public thoroughfares as though they were private roads on their country estates. Courtesy? That's for the other fellow. Common sense? A protective device for incompetent drivers, they think. Each of these chaps sets himself up as a king of the highway and let traffic beware!

Some drivers offend in ignorance of the decent conventions of motoring, and good might be accomplished by an official admonition to those receiving their first permits. They should be told to use the horn sparingly—that excessive use is an offense under the law. It should be impressed upon them that all elements in traffic have equal rights, and that the good driver, even possessing right of way, makes due allowance for pedestrians as the weaker party—for cases of pedestrians damaging automobiles are as rare as cases of automobiles breaking up railway locomotives.

It should be made very plain to them that efficiency in driving a motor car should be sought as keenly, and prized as highly, as efficiency at bridge or golf or making ples—that the competent driver simply does not have accidents, and does not startle people out of a year's growth.

Unfortunately it is not only the new drivers who need to be reminded of these things. Many men and women have operated motor vehicles for years and still lack even the most elementary qualifications of efficiency. For them there isn't much hope of change. They go on, with such luck as may be, and we must hope for the best. But from the youngsters coming along to the wheel boys and girls motor-conscious from their first years of understanding, something better should be expected.—Ottawa Journal.

World's Third Richest Man

For the information of gangsters, the fabulously wealthy Maharajah of Kapurthala, would like it known that he has brought none of his magnificent collection of family jewels with him during his visit to the United States. The Indian potentate, who arrived in New York on the Normandie, is reputedly the third richest man in the world.

## Little Helps For This Week

If thou has run with the footmen and they have wearied thee, then how canst thou contend with horses? And if in the land of peace wherein thou trustest they wearied thee, then how wilt thou do in the swelling of Jordan? Jeremiah 12:5.

How couldst thou hang upon the cross. To whom a weary hour is loss. Or how the scorn and scourging Who shrinkest from a scornful look?

A heart unloving among kindred has no love towards God's saints. If you have a cold heart towards a servant or a friend, why should you wonder if you have no fervor towards God? If we are cold in our private prayers we should be earthly and dull in the most devout religious order, if we cannot bear the vexations of a comrade how should we bear the contradictions of sinners, and if a little pain overcomes us how could we endure a cross? If we have no tender cheerful affectionate thought and love for those with whom our daily hours are spent, how should we feel the ardor of love to the unknown and evil, the ungrateful and repulsive?—H. E. Manning.

## Stamp Collector Was Lucky

Found Priceless Stamp In Lot Bought For Small Sum

A rarity of philately—the one penny Shakespeare charity stamp issued in Great Britain was discovered by Charles A. Davis of Dorchester, Mass., while looking through a large collection of 19th century stamps he purchased 30 years ago for a "song."

The stamp, bearing a likeness of the Bard of Avon, clean and undamaged, is virtually priceless. It is the only known copy in America, and one of few throughout the world.

It was among the British local stamps, issued by the National Carriers Co. some time between 1873 and 1875. These stamps were used by private concerns which carried mail and packages in competition with government mails, and come under the heading of "local" stamps. These stamps were part of a large stock which Davis bought for \$25.

## Stealing Fish Proved Costly

Two Men Heavily Sentenced For Taking Carp In Austria

Two men are serving terms in an Austrian prison paying for a meal they did not enjoy. They stole two carp from a fountain in a park in Baden, not knowing that the finny exhibits were under the protection of the Austrian Office of Ancient Monuments, experts having decided they were over 100 years old. Although they told the judge they hadn't been able to eat the fish because the cook could not make them palatable, the magistrate sentenced the thieves to two months' hard labor.

## R. A. Brown--Gleichen, Alta.

### ITEMS OF INTEREST OF THE TOWN AND DISTRICT

Milton Desjardine is in a hospital suffering from a severe attack of rheumatism.

The sidewalks of the town are undergoing their yearly repair. Old planks are being taken up and new ones put in their place. The old board walk running by Geo. Hunter's and B. F. Hearty's residences has been taken up entirely and a cinder path laid in its place.

Ell Woods was busy for the past week applying paint to the residence of Dr. Pyperharson. Thus the improvement in the appearance of the town goes on.

June 22—Under the auspices of the First Ranger Gleichen Company a strawberry festival will be held on the lawn of Mrs. A. L. Yates, from 3 to 6:30 p.m. Admission 25c. Everybody come and help the girls along.

J. A. Menard is having his home painted. The work being done by his son Raymond.

### THE WEEK AT OTTAWA

(By F. W. Gershaw)

In days gone by a list of elections would be made just before an election. If a name was left off a man could get his vote by applying in rural polls and making a statement that he was entitled to vote. That has all been changed. The government spent over a million dollars to get a basic list printed and for six weeks each year the lists are open for adding new names. However, the lists are at all other times closed and if a voters name is not on the list he shall not vote as there is no way of having names added on election day.

In Montreal the big game seems to be to keep the names of people who have died or moved away on the list and then on election day have impersonators to vote for those names. This week the Secretary of State made a bitter attack on Chief Justice Greenshield because of some alleged misunderstanding of the real meaning of the law. Mr. Cahan's party workers wanted some 4,000 names struck off and the Judge hesitated about doing it until more evidence was presented that they should be struck off.

However, if a man has been left off about which there is no question, it can be added by the registrar of elections before June 29th.

The clash between Mr. Stevens and Mr. Bennett was the most spectacular event of the week. Mr. Stevens recalled that the Government had been elected by a big majority in 1930. The people trusted them. He quoted at length from the radio speeches of the Prime Minister and the promises therein contained. Mr. Stevens said: "The primary producer is the one who has lost out. Have we been invited to take adequate steps to correct these inequities? I submit that no adequate steps have been taken."

He did not blame any party for the loss of foreign markets but he did blame the Government for not going of the gold standard in 1930 with Great Britain. On this account our exporters have been at a great disadvantage for all these years on account of the adverse exchange. He said: "We have not solved our domestic problems we have not solved our unemployment problem and we have not reduced our interest charges or dealt adequately with the wheat situation. The government came into existence five years ago with high expectations and had been nurtured through with dissertations on constitutional law."

Mr. Bennett was loudly applauded by his followers when he arose to reply. He pointed out that he had gone as far as the constitution would permit. He said if people thought that this parliament could pass any kind of legislation without regard for the Constitution that the age of lawlessness was upon us. The first steps toward fascism and dictatorship in Europe were appeals to the prejudice of the little man, then disregard for Constitutional limitations. Members of all parties saw with regret and sadness that the long existing friendship of these two men had ended.

## SAVE

WE'VE heard a lot of that word "save" in the past few years. For some time now the question of saving our pennies and dimes has not only been important—but imperative.

Also, it may be noted that everyone who is in the business of selling merchandise to the public has devoted his attention to pointing out how much you, the customer, can SAVE by dealing with him, to the exclusion of others. Which is perfectly all right, too, in its way, except that it is advisable for a customer in his own interests to be sure that the savings that he is getting are real and not simply over-enthusiasm on the advertiser's part. In other words to save where it's SAFE to save—to save, for instance, at EATON'S, where value means not simply cheapness—but quality at a price—and where every claim regarding merchandise is backed by an iron-clad guarantee of satisfaction that makes every purchase doubly safe. It's natural to want to save—but it's wise to remember that it's SAFE to save at EATON'S.

EATON'S
